DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p.6-9, filed 11/05/10, with respect to 103(a) rejection of claims 1-9 and 13-18 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "at least two oscillators" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. The limitation is interpreted herein as to also include wherein the oscillators can be more than two, which is not shown in any of the drawings.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be

necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a

nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

3. The disclosure is objected to because of the following informalities: please note the specification arrangement for the US patent applications. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, at the last line, the claim recites "value of said frequency". Previously, the claim recites "two or more frequencies", "the immediately previous frequency", "the next frequency", and "each frequency". By simply stating at the last line, "... said sequence is independent of the value of said frequency", it is unclear which frequency the limitation is referring to. The claim recites various terms that contain "frequency". Hence, it is unclear and indefinite of whether "said frequency" in the last line is referring back to recites "two or more frequencies", "the immediately previous frequency", "the next frequency", or "each frequency".

Regarding claim 16, the method claim appears to depend on an apparatus of claim 1. It is unclear from the recitation of whether the applicants intend to claim an apparatus claim or a method claim.

Regarding claims 17 and 18, its depending claims of 1 or 15 already recites an apparatus or a method of generating a clock signal. By simply reciting as claimed, it is unclear of what further limitations applicants intend to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 is rejected as applied to claim 1, wherein claims 2-14 and 16-18 depend on claim 1 or 15.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Irving et al. US 6,522,698 B1 disclose a system comprising plurality of oscillators.
